

Principles and Practice of End Point Assessment

Session Content

There is a higher demand for Independent Assessors to carry out Standard apprenticeship End Point Assessments, in many vocational areas within the industry, than there are qualified Assessors with the knowledge and understanding of how to carry out End Point Assessment. With the Government targeting 3 million apprentices there is a rapidly growing need for suitably qualified people to become Independent End Point Assessors.

This is a fantastic development opportunity for any assessor looking to expand their employment prospects.

What the course involves:

The course is delivered as a 1-day remote workshop, after which there will be individual support sessions to provide guidance and support to enable you to successfully submit the series of assignments electronically up to 10 working days after your training event.

What does the training involve?

You will learn the principles and practices of End Point Assessment and understand and develop the skills required to enable you to carry out independent assessments for End Point Assessment.

The Course is one unit which must be fully completed to gain the accreditation, The Principles and Practices of End-Point Assessment

This qualification is assessed by the following method:

The Unit consists of knowledge and skills assessments. The knowledge is assessed by the completion of an assignment, delegates will demonstrate skills throughout a variety of simulated activities which are observed during the 1-day workshop and where required a professional discussion can be used to further support submitted evidence

Who would benefit from his course?

- Those who want to become carry out Independent End Point Assessors.
- Those working with apprentices to develop their knowledge and understanding of how to support and prepare their learners for End Point Assessment.
- Those who are already Independent EPA Assessors and want a certificate to accredit their existing skills.
- Employers involved in the new apprenticeship standards who want a greater understanding on how to support and prepare their apprentices for End Point Assessment.

Principles and Practice of End Point Assessment

Testimonials

“As a practicing EPA this course was huge benefit in teaching me about the policies and procedures that need to be both followed and considered when out in the field. Completing the course was a great opportunity to network with other professionals and exchange experiences. Doing the work for the qualification was thought provoking and allowed me to research the excellent range of resources provided”.

“I felt the course was very worthwhile and interesting, it was especially interesting as there were people at different stages in their EPA development and their contribution made it very interesting. I believe this will make me more valuable to my employer and helps me better support my apprentices that I am supporting through their standard apprenticeship”.

I have been an assessor for 18 years, an IV/IQA for 15 years, and didn't think I had much to learn from an EPA course. I couldn't have been more wrong. The approach and methodology is very different, and the implications of bad practice are huge. This is a well-structured, insightful programme and I would recommend it to anyone thinking of taking the step into End Point Assessing’.
